

# **Company Overview: Products, Capabilities and Experience**

# Empowering the Clean Energy-fueled Future

**Market Intelligence**

**Asset Insight**

**Tools for Action**

REsurety is the leading analytics company empowering the clean energy economy. Operating at the intersection of weather, power markets and financial modeling, we enable the industry's decision makers to thrive with best-in-class value and risk intelligence, and the tools to act on it.

With the world's most sophisticated clean energy investors, advisors, buyers, and developers as clients and 7,000 MW of transactions closed, REsurety empowers our clients to prosper in the dynamic, data-driven, clean energy-fueled future.

# Our Experience By The Numbers

**7GW**

renewable energy hedges supported

---

**14,000**

project locations assessed in REmap

---

**750+ nodes**

power price locations

---

**2,000+**

met tower years processed

# What Our Clients Are Saying

REsurety's data and analytics empower us to offer best-in-class risk management tools to clean energy markets.

– Maria Rapin, CEO, Nephila Climate

REsurety's products represent the future of the renewable energy industry.

– Jim Howell, CEO & Co-Founder, Birch Infrastructure

REsurety is tackling a fundamental data gap we have all been grappling with.

– David Scaysbrook, Managing Partner, Quinbrook Infrastructure Partners

# Our Clients Include

MARATHON CAPITAL

TAA LERI

# Risk Management

## Hedge Origination & Structuring

REsurety provides a comprehensive risk management toolkit, supporting diverse customer types and a range of risk tolerances.

## For Clean Energy Sellers

Revenue Swap	PPA	Balance of Hedge
<p><b>Description</b> Fixed \$ contract, frequently used to support project financing</p> <p><b>Use Case</b> New &amp; existing merchant projects seeking revenue certainty</p> <p><b>Experience</b> &gt;2,000 MW Closed</p>	<p><b>Description</b> Fixed \$/MWh contract, frequently used to support project financing</p> <p><b>Use Case</b> New &amp; existing merchant projects seeking revenue certainty</p> <p><b>Experience</b> Experience: &gt;2,000 MW Closed</p>	<p><b>Description</b> Fixed \$ or \$/MWh contract that mitigates the residual volume and market price risks of a traditional hedge</p> <p><b>Use Case</b> New &amp; existing projects with hedges seeking additional revenue certainty</p> <p><b>Experience</b> ~500 MW Closed</p>

## For Clean Energy Buyers

Settlement Guarantee Agreement	Volume Firming Agreement
<p><b>Description</b> Fixed payment contract enabling the transfer of uncertain future PPA settlements to a hedge provider</p> <p><b>Use Case</b> Buyers seeking to eliminate financial exposure to the commodity and weather-driven volatility of PPA settlements</p> <p><b>Experience</b> ~50 MW Closed</p>	<p><b>Description</b> Financial firming of PPA settlements, helping clean energy buyers transfer volume and shape risks</p> <p><b>Use Case</b> Buyers seeking to improve efficacy of intermittent PPA as a hedge on electricity costs</p> <p><b>Experience</b> ~900 MW Closed</p>

## Transaction Services

REsurety provides settlement calculation, valuation and compliance reporting services:

### Settlement

Calculation of settlement payments, including separation of operational and weather-driven gains and losses

### Valuation

Automated, dynamic forward valuation of contracts for accounting and compliance purposes

### Reporting

Reporting of creation and continuation data for Dodd-Frank compliance

---

## Advisory Services

Some problems can't be solved with an out-of-the-box solution. Contact us today to learn more about how we can help you understand and manage your clean energy risks.

What we advise on:

Asset value, forecasting and risk assessment

Portfolio optimization and hedging strategy

Contract performance auditing

## Products & Services:

# Software

REsurety's software products leverage our unique expertise at the intersection of atmospheric science, power market modeling and big data. Billions of data points are integrated, quality controlled and analyzed to provide the financial metrics that are critical to renewable energy decision makers' success.

## Market Intelligence: REmap

REmap offers unprecedented market analytics and unrivaled, data-driven insight into the financial performance of clean energy markets, assets and contracts.

**REmap is a sea-change in the access to quantity and quality of data.**

*– Joan Hutchinson, Managing Director, Marathon Capital*

# 30+

metrics per project

# 14,000

projects

# 50,000+

price locations

**VISUALIZE & COMMUNICATE** market risks and trends to stakeholders with quick and transparent access to regional metrics and project-specific data.

**EVALUATE & DILIGENCE** revenue and generation before spending time and money on third party analysis or reports.

**DOWNLOAD** hourly generation and price time series with a click to seamlessly integrate into your workflow.

## Asset Insight: REview

REview helps you quickly and accurately track, audit, and explain your specific asset's financial and environmental performance. In a world where "set it and forget it" no longer applies, RESurety's powerful suite of analytics enables best-in-class management of clean energy contracts, assets, and portfolios.

**MONITOR asset performance** and track your full portfolio in one place and in near real-time.

**AUDIT results** to quickly flag invoice errors, project availability, and impacts of operational performance.

**EXPLAIN drivers of revenue or cost** and quantify the financial and environmental impacts of operating decisions.

## Carbon Impact: Locational Marginal Emissions

RESurety's patent-pending Locational Marginal Emissions (LME) technology calculates the historical carbon emissions or abatement at each node with hourly granularity, bringing unparalleled accuracy to measuring how your clean energy purchases, load centers, or other sustainability decisions directly impact decarbonization goals.

**RESurety's LME data give us the transparency we need to make climate-wise investments."**

*– Brian Janous, GM of Energy and Renewables, Microsoft*

**MEASURE carbon emissions abated** by your actual or planned clean energy purchases or resulting from load center operations.

**MAXIMIZE decarbonization** by selecting the technologies and locations that have the biggest carbon impact.
